“DivcoWest believes that a healthy environment is necessary for the well-being of our society. We are committed to the responsible use of natural resources and sound waste management policies, by implementing sustainable property operations, green construction, and a culture of awareness. Maintaining a healthy environment is one of the most important challenges of our time. As an intrinsic part of how we do business, DivcoWest proactively seeks ways to improve energy efficiency, waste management, and water conservation for all of our operating assets.
